Indonesia-Japan Medical collaboration

with Free Buffet and Lucky Draw

February 23, 2013 (Sat) 8:00-14:00

Hotel Indonesia Kempinski

Jl. MH Thamrin 1, 10310 Jakarta

Phone: +62 21 2358 3800

**Advanced cancer control
in Japan**
(From diagnosis to heavy particle treatment)

**Current status of
treatment for liver disease**

Prof. Ryosuke TSUCHIYA

He is a specialist in the treatment of later stages of lung cancer and is known with his bright and friendly character. He was the Chief Director of National Cancer Center Hospital between 2006-2010 and led the team to hit the highest record of surgeries in Japan.

Prof. Koichi TANAKA

He has played a central role in developing a global standard for living-donor liver transplantation and is renowned as the pioneer of this field. By 2005, he had performed over 2,000 cases which is the largest number in the world. He is devoted to train over 400 surgeons from abroad and keeps promoting the international medical exchange.
